#### GITHUB | LINKEDIN | CODECHEF

### **EDUCATION**

DHARMSINH DESAI UNIVERSITY BTECH COMPUTER SCIENCE GPA: 8.87

July 2019 - July 2023 Nadiad,Gujarat

### **EXPERIENCE**

GOOGLE DEVELOPERS STUDENTS CLUB | Senior Machine Learning Team Member Nadiad, India | Sep 2020 - Present

• Developed a model which aimed at predicting google's stock price based on previous trends. Used LSTM's to solve the problem achieved a decent approximation. Also helped the Data Analysis team.

# **SKILLS**

PROGRAMMING LANGUAGES Javascr

Javascript, Python, C++, C#

LIBRARIES/FRAMEWORKS
TOOLS / PLATFORMS

MERN stack, React, Tensorflow, Django, Seaborn, ASP.NET Google Colab, Android Studio, Github, Git CLI, Git Lab

DATABASES

MYSQL, SQL, Mongo DB

## PROJECTS / OPEN-SOURCE

#### DDU PLACEMENT PORTAL | LINK

MySQL, React, Electron, NodeJs

A real world project aimed at making the placement process flow as smooth as possible. The Web-App has both admin and student dashboards . Also was designed as per the requirements of the university. The project is basically made to register the student for a placement application , collect and analyze all his details. The project is still under development

#### DCGAN-MNIST | LINK

Python, Google Colab

With this project I implemented the Generative adversarial networks (GANs). Also was able to achieve decent results. This was the implementation of the paper by IAN Goodfellow.

#### SOCIALHUB | LINK

Django, Django Channels, redis, SQLITE3

Successfully developed a social media website in Django framework using Django channels library for asynchronus communication using web sockets for chatting purpouse. Also the app had options for creating sharing liking commenting on a post. The app also featured a trending page.

#### ONLINE BIDDING APP I LINK

PHP, Ratchet, HTML, JS

The project aimed at creating a online bidding app. The app was extremely time and price sensitive and required constant updates of price for the same I used the websockets through which we updated the price in real time on each auction. I implemented it using ratchet library.

#### SERVERLOGGERJS | LINK

Javascript, Chalk, NodeJs

Published a NPM package for logging. This is aimed at creating simple server logs. The package is published under NPM and has about 700 downloads averaging about 50 per week.

# **HONORS & AWARDS**

- Ranked 5184th in the world in Google HashCode 2021
- Ranked 1249th in the world amongst 22000 participants in Codechef long challenge DEC 2020
- Ranked 1523rd in the world amongst 15000 participants in Codechef NOV20B
